## Log Book

- Stores and tracks previous activities conducted by users.

## Fully Integrated with Card Access Control

- Allows users to playback on any historical event and identifies the correct user and user ID.

## POS Integration

- Text overlay, collects data for market research and records images at the same time.
- Enables you to narrow down your search of historical data by focusing on key areas of interest by providing exception reporting (e.g. no sales, returns, or cash)
