

Quality Clarity Choice

The Panasonic Ultraplex™ Wireless Communication Systems give you the power to

- improve speed of service to your customers
- reduce the noise level in your restaurant
- maximize employee efficiency and productivity
- provide an effective employee training tool
- help you monitor your business performance

and more! Experience Ultraplex™ features designed to help move customers through your lane – fast!

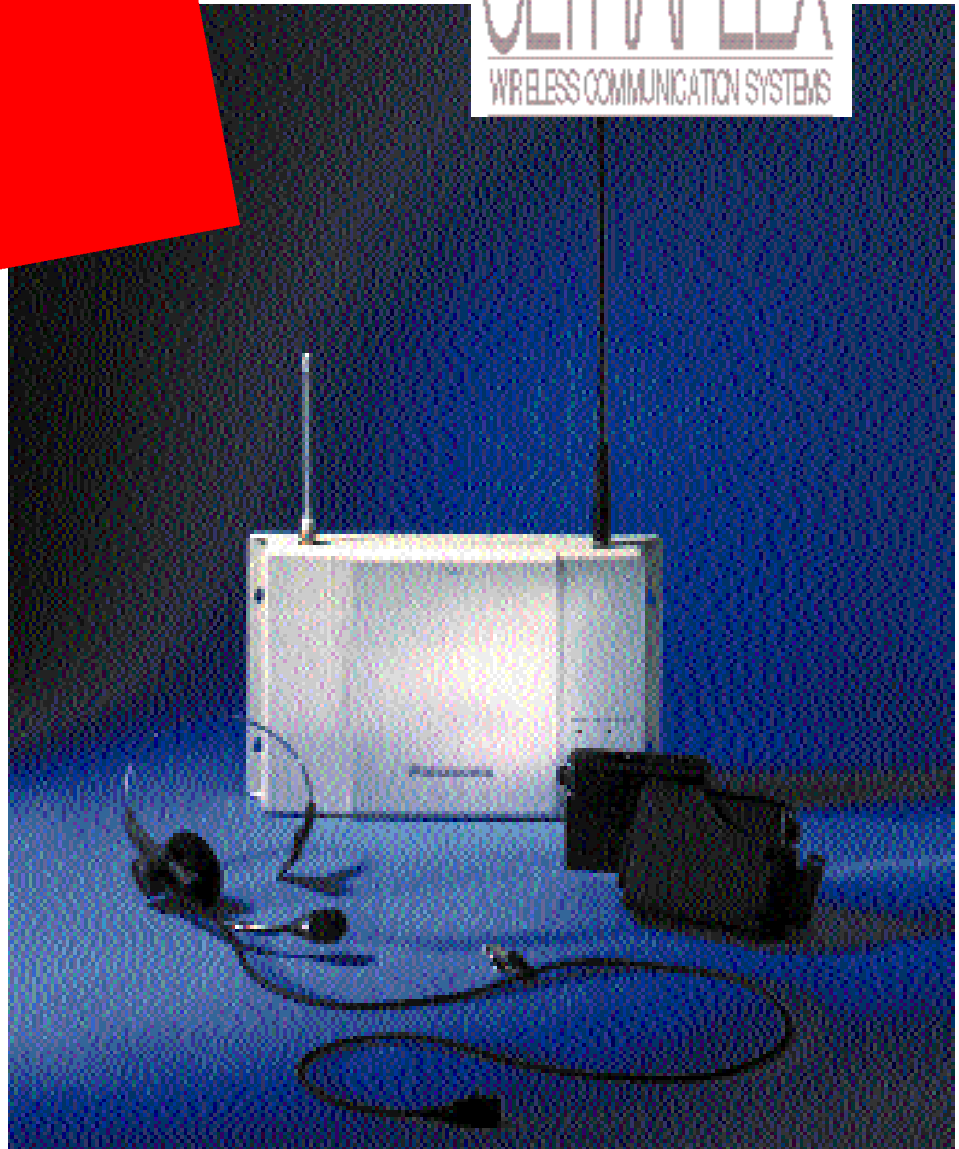

- Designed with **full duplex technology**, the Ultraplex Systems permit simultaneous communication between your crew and your customers.

- The Ultraplex **order taker** is designed for low power consumption. Microprocessor-enabled features such as sleep mode help minimize drain on the battery to preserve battery life.

- **Standard diversity reception** helps maintain the best possible signal to your customers and crewpersons, providing clear, uninterrupted communication throughout the restaurant.

- The **electronic A/B selector** is ideal for dual lane drive-thru configurations. The built-in function allows switching between two different systems, with audible identification tones and car-waiting alerts.

ULTRAPLEX™
WIRELESS COMMUNICATION SYSTEMS

Panasonic offers you more ways to best meet your communication needs:

900 MHz	Stores that don't need an extended operating range benefit from a license-free system.
UHF	While the UHF system requires FCC Licensing, its higher power provides expanded communication.
